IMAS BUSINESS SCHOOL

PGDM – ARTIFICIAL INTELLIGENCE & DATA SCIENCE

WEBSITE PAGE CONTENT & DEVELOPER IMPLEMENTATION SPECIFICATION

Build Management Expertise. Master AI & Data Science. Become Industry-Ready.

Developer Handoff Document

Page architecture • UI/UX • Curriculum • SEO • CMS • Responsive behaviour • Accessibility

DOCUMENT PURPOSE

This document is intended for direct hand-off to the website development and UI/UX team. It defines the recommended page structure, content hierarchy, curriculum presentation, SEO keyword placement, responsive behaviour and CMS requirements for the PGDM – Artificial Intelligence & Data Science programme page.

Important publication note: placement figures, eligibility, fees, institutional claims, partner names and other time-sensitive facts should be validated by IMAS before publication.

01 Programme Positioning

Programme: PGDM – Artificial Intelligence & Data Science

Duration: 2 Years | Format: Full-Time

Academic Architecture: Semester I & II – Common Curriculum; Semester III & IV – AI & Data Science Specialisation

Core Positioning: Management + Technology + Data + Artificial Intelligence + Business Application

Signature Learning: Python, SQL, Machine Learning, Data Visualisation, Big Data, AI Ethics, Responsible AI and Industry-Based Capstone.

Primary CTA: Apply Now | Secondary CTAs: Download Brochure, Talk to an Admissions Counsellor

02 Page Flow

#	Section	Primary UI / Developer Direction
01	Hero	Premium hero, programme title, positioning statement, badges and CTAs
02	Placement Highlights	High-visibility metrics block
03	Programme Snapshot	Compact facts / icon cards
04	Why PGDM – AI & Data Science	Six benefit cards
05	What Makes This Programme Different	Six differentiators
06	Programme Architecture	Year 1 → Internship → Year 2 → Capstone timeline
07	Year 1 Curriculum	Semester I / Semester II tabs; common curriculum
08	Summer Internship	8–10 week internship module
09	Year 2 Curriculum	Semester III / Semester IV tabs
10	Tools & Skills	Six skill cards
11	Experiential Learning	Learn → Practise → Analyse → Apply → Present
12	Expert Testimonials	Two YouTube video cards
13	International Immersion	Destination tabs
14	Assessment	50 / 30 / 20 visual
15	Placements & Career Support	Metrics + preparation modules
16	Career Pathways	Role clusters
17	Eligibility	CMS-driven approved eligibility
18	Admission Process	Six-step process
19	Fee Structure	CMS-editable fee table

#	Section	Primary UI / Developer Direction
20	FAQs	Accordion
21	Final CTA	Strong conversion block

03 Hero Section

H1: PGDM – ARTIFICIAL INTELLIGENCE & DATA SCIENCE

Headline: Build Management Expertise. Master AI & Data Science. Become Industry-Ready.

A future-focused PGDM AI and Data Science programme combining business education with practical learning in Artificial Intelligence, Data Science, Machine Learning, Analytics and Business Intelligence.

Programme badges: 2-Year Full-Time PGDM | Common Foundation in Year 1 | AI & Data Science Specialisation in Year 2 | Industry Internship | Industry-Based Capstone

CTAs: Apply Now | Download Brochure | Talk to an Admissions Counsellor

Developer: Use a premium technology/management visual language. Avoid an overly engineering-only appearance; the programme is a management programme with AI & Data Science specialisation.

04 Placement Highlights

Highlight	Display
Highest CTC	₹18.5 LPA*
Placement Support	100% Placement Assistance*
Programme Duration	2 Years
Industry Internship	Mandatory 8–10 Weeks
Capstone	Industry-Based

*All placement statistics and claims should be validated by IMAS before publication.

05 Programme Snapshot

Component	Structure
Duration	2 Years
Format	Full-Time
Year 1	Common Management & Technology Foundation
Semester I	Common Curriculum
Semester II	Common Curriculum
Summer	Mandatory 8–10 Week Industry Internship
Year 2	AI & Data Science Specialisation
Semester III	AI & Data Science Core
Semester IV	Advanced AI, Analytics & Capstone
Learning Approach	Management + Technology + Application

06 Why PGDM – AI & Data Science?

Modern managers increasingly need to understand Data, Analytics and AI and how these technologies support organisational decision-making.

Business Foundation: Management, economics, finance, marketing, HR and business environment.

Data & Analytics: Statistics, databases, SQL, data visualisation and business intelligence.

Artificial Intelligence: Machine learning, advanced AI, deep learning and NLP fundamentals.

Business Application: Applying AI and Data Science to real-world management and organisational problems.

Responsible Technology: Understanding AI ethics, governance and responsible AI.

Industry Exposure: Internship, case studies, simulation labs and an industry-based capstone.

07 What Makes This Programme Different?

Feature	Content Direction
Management + AI	Management fundamentals alongside emerging Artificial Intelligence and Data Science capabilities.
Common Foundation	Year 1 establishes the common PGDM foundation before specialised Year 2 learning.
Hands-on Technology	Python, SQL, Machine Learning, Data Visualisation and Analytics Platforms.
Business Applications of AI	AI concepts connected to business functions and organisational decisions.
Responsible AI	AI Ethics, Governance and Responsible AI Frameworks.
Industry-Based Capstone	Apply AI & Data Science learning to an industry-oriented project.

08 Programme Architecture

YEAR 1 — COMMON MANAGEMENT & TECHNOLOGY FOUNDATION

Semester I → Semester II

↓

SUMMER INTERNSHIP — Mandatory 8–10 Week Industry Internship

↓

YEAR 2 — AI & DATA SCIENCE SPECIALISATION

Semester III → Semester IV

↓

CAPSTONE — Industry-Based AI & Data Science Project

Developer: Present this as a horizontal timeline on desktop and a vertical timeline on mobile.

09 Year 1 – Common Curriculum

COMMON MANAGEMENT FOUNDATION — ALL STUDENTS

Semester I & Semester II are common to students before entering the specialised AI & Data Science curriculum.

UI: Use two tabs: SEMESTER I | SEMESTER II.

CMS: Ideally use a reusable Common Year 1 Curriculum component so approved changes can propagate across relevant PGDM pages.

The exact Semester I and Semester II subject list should be inserted from the approved common PGDM curriculum; this specification does not invent those subjects.

10 Summer Internship

LEARN IN THE CLASSROOM. EXPERIENCE THE INDUSTRY.

After Year 1, students undertake a mandatory 8–10 week Summer Internship.

Potential AI & Data Science exposure: Business Analytics, Data Analysis, Business Intelligence, AI Applications, Market Analytics, Customer Analytics, Operations Analytics, Reporting & Dashboards, Data-Driven Decision Making.

11 Year 2 – AI & Data Science Specialisation

Year 2 moves from management foundations into specialised learning in: Programming → Data → Machine Learning → AI → Analytics → Business Application.

UI: Use Semester III / Semester IV tabs. On mobile, use horizontal swipeable tabs.

Semester III	Semester IV
Python Programming for Data Science	Advanced Machine Learning & AI
Statistics & Probability for Data Science	Deep Learning & NLP (Basics)

Semester III	Semester IV
Database Management & SQL	Big Data Analytics
Machine Learning Fundamentals	AI Ethics, Governance & Responsible AI
Data Visualization & Business Intelligence	AI & Data Science Case Study & Simulation Lab
Business Applications of AI	Capstone Project (Industry-Based)

12 Tools & Skills You Will Master

Build Practical Technology Skills Alongside Management Expertise.

Skill Area	Developer Copy
Python for Data Science	Develop practical Python capabilities for Data Science and data analysis applications.
SQL & Database Management	Understand how data is structured, stored, queried and managed using databases and SQL.
Machine Learning Models	Develop an understanding of machine learning models and their business applications.
Data Visualization	Learn to communicate data insights using Power BI / Tableau.
Big Data & Analytics Platforms	Gain exposure to technologies and platforms used for analytics involving large and complex datasets.
Responsible AI Frameworks	Understand principles related to AI Ethics, AI Governance and Responsible AI.

13 Experiential Learning

FROM CONCEPTS TO APPLICATION

Learn → Practise → Analyse → Apply → Present

Case Studies: Analyse real-world AI, Data Science and Management problems.

Simulation Labs: Use simulation-based learning to understand AI and Data Science applications.

Business Problems: Connect technical concepts with organisational and managerial challenges.

Industry Internship: Gain practical exposure through an 8–10 week internship.

Capstone Project: Work on an industry-based AI & Data Science project.

14 Expert Testimonials – Two YouTube Videos

Section heading: WHAT INDUSTRY EXPERTS SAY

Placement: After Why PGDM – AI & Data Science and before detailed Curriculum.

Desktop: Two video cards side-by-side. Mobile: Stack vertically.

Expert Video 01: The Role of AI in Modern Business — AI and business transformation, data-driven decision-making, AI skills and future management roles.

Expert Video 02: Building Careers at the Intersection of Management & Technology — AI & analytics careers, technology-enabled business and future skills.

CMS fields: Expert Name, Designation, Organisation, Expertise, YouTube URL, Thumbnail, Short Description, Display Order, Active/Inactive.

Technical: No autoplay. Lazy-load YouTube iframe on click. Use accessible title/controls.

15 International Immersion

THINK GLOBAL. LEARN BEYOND THE CLASSROOM.

Destination tabs: Dubai | Singapore | Thailand | Bali, Indonesia

Each tab: image, academic exposure, business/industry exposure, global business perspective, cross-cultural learning, international networking, educational/cultural experience.

International immersion opportunities, destinations, institutional visits and programme components are subject to academic schedule, partner availability and applicable programme arrangements.

16 Assessment Framework

Weight	Assessment Component
50%	Theory Examination
30%	Tool / Lab / Skill-Based Work
20%	Viva / Project / Case Defence
100%	Total

17 Placements & Career Support

FROM CLASSROOM LEARNING TO CAREER READINESS

₹18.5 LPA — Highest CTC*

100% — Placement Assistance*

Career preparation modules: Resume Development, Interview Preparation, Group Discussions, Communication Skills, Aptitude Preparation, Industry Interaction, Career Counselling, Internship Support and Domain-Oriented Career Preparation.

Do not convert “100% Placement Assistance” into “100% Placement”.

18 Career Pathways

Career Cluster	Potential Roles
Data & Analytics	Data Analyst; Business Analyst; Data Analytics Executive; Business Intelligence Analyst
Artificial Intelligence	AI Business Analyst; AI Solutions Executive; AI Project Coordinator; AI Product Support Roles
Machine Learning	Machine Learning Associate; ML Business Analyst; Analytics Associate

Career Cluster	Potential Roles
Business Intelligence	BI Analyst; Dashboard & Reporting Analyst; Business Intelligence Executive
Technology-Enabled Management	Digital Transformation Executive; Technology Business Analyst; Product Operations Executive; Data-Driven Business Operations Roles

Career pathways are illustrative and should not be presented as guaranteed placement outcomes.

19 Eligibility

Use the current approved IMAS eligibility criteria.

CMS fields: Educational Qualification, Minimum Marks, Accepted Graduation Background, Entrance / Selection Requirements, Other Applicable Conditions.

Do not hard-code eligibility until the current approved admission policy is confirmed.

20 Admission Process

Step	Process
01	Enquiry
02	Application – Complete the PGDM Application Form
03	Counselling – Discuss academic background, interests and career goals
04	Selection – Complete applicable selection process
05	Admission – Complete admission formalities
06	Programme Begins

21 Fee Structure

Display the approved programme fee structure clearly. The fee breakdown below must be CMS-editable and displayed consistently wherever fees are shown on the programme page.

Fee Component	Amount
Programme Fee	₹5,45,000
Admission Fee	₹50,000
Other Applicable Charges	₹21,600
Total Programme Fee	**₹6,16,600**

Developer note: Fees must be validated against the latest IMAS-approved fee schedule before publication.

22 FAQs

Question	Answer
What is PGDM – Artificial Intelligence & Data Science?	A two-year postgraduate management programme combining Management Education, Artificial Intelligence, Data Science, Machine Learning, Analytics and Business Intelligence.

Question	Answer
Is the first year common?	Yes. Semester I and Semester II follow the Common PGDM Curriculum, while the specialised AI & Data Science Curriculum begins in Semester III.
What will I study in Semester III?	Python Programming for Data Science, Statistics & Probability for Data Science, Database Management & SQL, Machine Learning Fundamentals, Data Visualization & Business Intelligence and Business Applications of AI.
What will I study in Semester IV?	Advanced Machine Learning & AI, Deep Learning & NLP, Big Data Analytics, AI Ethics, Governance & Responsible AI, AI & Data Science Case Study & Simulation Lab and an Industry-Based Capstone Project.
Which AI & Data Science tools will I learn?	Python, SQL, Machine Learning Models, Power BI/Tableau, Big Data & Analytics Platforms and Responsible AI Frameworks.
Is there an internship?	Yes. Students undertake a mandatory 8–10 week Summer Internship after Year 1.
Is there an Industry-Based Capstone Project?	Yes. Semester IV includes an Industry-Based AI & Data Science Capstone Project.

23 Final CTA

24 SEO Keyword Strategy

The keywords below should be naturally distributed across H1/H2 headings, introductory copy, curriculum content, FAQs, metadata, image alt text and internal links. Do not keyword-stuff the page.

PRIMARY KEYWORDS

PGDM Artificial Intelligence and Data Science • PGDM AI and Data Science • PGDM in Artificial Intelligence • PGDM in Data Science • PGDM AI Data Science Kolkata • PGDM Artificial Intelligence Kolkata • PGDM Data Science Kolkata • AI Data Science PGDM

SECONDARY KEYWORDS

PGDM AI course Kolkata • PGDM Data Science course • PGDM Artificial Intelligence course • PGDM Machine Learning • PGDM AI and Machine Learning • PGDM Business Analytics • PGDM Data Analytics • Data Science management course • Artificial Intelligence management course • AI and Data Science course after graduation

HIGH-INTENT KEYWORDS

PGDM AI Data Science Admission • PGDM AI Data Science Fees • PGDM AI Data Science Eligibility • PGDM AI Data Science Curriculum • PGDM AI Data Science Placement • PGDM AI Data Science Colleges in Kolkata • PGDM AI Data Science Admission 2026 • PGDM AI Data Science Course in Kolkata

25 SEO & Technical Implementation

Recommended URL: /programs/pgdm-artificial-intelligence-data-science

Suggested Page Title: PGDM Artificial Intelligence & Data Science | PGDM AI Data Science in Kolkata | IMAS

Suggested Meta Description: Explore PGDM Artificial Intelligence & Data Science at IMAS — a 2-year management programme combining AI, Data Science, Machine Learning, Analytics, internship and industry-based projects.

H1: PGDM – Artificial Intelligence & Data Science

Structured Data: Course, FAQPage, BreadcrumbList and Organization where applicable.

Internal Linking: Link to PGDM overview, admission page, fee page, placement page, international immersion, brochure and relevant supporting articles.

Image Alt Text: Use descriptive, meaningful alt text; do not stuff keywords.

Canonical: Self-referencing canonical unless site architecture requires otherwise.

26 Responsive, Accessibility & Performance Requirements

Mobile: Horizontal swipeable tabs, stacked metrics, vertical timeline, stacked cards and fixed bottom CTA.

Desktop: Two-column/three-column card grids where appropriate, premium whitespace and clear content hierarchy.

Tabs: Keyboard accessible, visible focus state, ARIA roles/labels and URL/state handling where appropriate.

Accordion: Keyboard accessible with expanded/collapsed state announced to assistive technologies.

Video: Lazy-load YouTube embeds; no autoplay.

Images: Web-optimised, responsive and lazy-loaded below the fold.

Performance: Minimise third-party scripts and protect Core Web Vitals.

Accessibility: Sufficient contrast, semantic HTML, descriptive labels, keyboard navigation and accessible buttons.

CMS: Programme information, curriculum, fees, placement figures, testimonials, immersion destinations and FAQs should be editable without code changes.

27 Non-Negotiable Developer Requirements

- The programme must be presented as PGDM – Artificial Intelligence & Data Science.
- Semester I & II must be clearly shown as the Common Curriculum.
- Semester III & IV must be shown as the AI & Data Science Specialisation.
- Do not mix Year 1 common subjects into the Year 2 specialised curriculum.
- Use tabbed curriculum navigation rather than one long undifferentiated subject list.
- The six Tools & Skills must have a prominent visual section.
- The two Expert Testimonial video blocks must be CMS-editable.
- International Immersion must use destination tabs.
- Placement information must be prominent but must not make unsupported employment guarantees.
- Use 100% Placement Assistance, not “100% Placement”.
- All fees, eligibility, placement figures and other changeable data must be CMS-editable.
- SEO keywords should be integrated naturally; do not keyword-stuff.
- The mobile experience must be designed independently, not treated as a scaled-down desktop page.
