16	Career Pathways	Analytics role clusters
17	Eligibility	CMS-driven approved eligibility
18	Admission Process	Six-step process
19	Fee Structure	CMS-editable fee table
20	FAQs	Accordion
21	Final CTA	Conversion block

03 Hero Section

H1: PGDM – BUSINESS ANALYTICS

Headline: Build Management Expertise. Master Business Analytics. Make Data-Driven Decisions.

A future-focused PGDM Business Analytics programme combining management education with practical learning in Business Intelligence, Data Analytics, Predictive Analytics, Decision Modelling, AI-enabled Analytics and Data-Driven Decision Making.

Programme badges: 2-Year Full-Time PGDM | Common Management Foundation in Year 1 | Business Analytics Specialisation in Year 2 | Mandatory Internship | Industry-Based Capstone

CTAs: Apply Now | Download Brochure | Talk to an Admissions Counsellor

Design: Premium business/analytics visual language. Avoid making the page look like a pure programming programme; this is a management-led programme with analytics specialisation.

04 Placement Highlights

Highlight	Display

Format	Full-Time
Year 1	Common Management Foundation
Semester I	Common Curriculum
Semester II	Common Curriculum
Summer	Mandatory 8–10 Week Industry Internship
Year 2	Business Analytics Specialisation
Semester III	Business Analytics Core
Semester IV	Advanced Analytics & Capstone
Learning Approach	Management + Analytics + Application

06 Why PGDM – Business Analytics?

WHERE MANAGEMENT MEETS DATA-DRIVEN DECISION MAKING

Modern organisations increasingly rely on data to understand markets, customers, operations and performance.

Management Foundation: Build a foundation in management, economics, finance, marketing, HR and business environment.

Data Analytics: Understand how data can be analysed and interpreted for business decision-making.

Business Intelligence: Develop skills in Business Intelligence, Data Visualisation, Reporting and Dashboards.

Predictive Analytics: Understand how historical data can support forecasting and predictive decision-making.

Decision Modelling: Apply Decision Modelling, Optimization and Simulation to business problems.

AI-enabled Analytics: Explore the emerging role of Artificial Intelligence in Business Analytics.

07 What Makes This Programme Different

Feature	Content Direction
Management + Analytics	Learn management concepts alongside practical Business Analytics capabilities.
Common Foundation	Year 1 establishes the common management foundation before specialised analytics learning.
Business Intelligence	Practical exposure to Power BI / Tableau, data visualisation and business intelligence.
Predictive & Prescriptive Analytics	Move beyond descriptive reporting into prediction and recommended business actions.
Decision Modelling	Understand analytical models and optimisation techniques for business decisions.
AI-enabled Analytics	Explore Artificial Intelligence applications within Business Analytics.
Industry-Based Capstone	Apply analytics concepts to an industry-oriented project.

08 Programme Architecture

YEAR 1 — COMMON MANAGEMENT FOUNDATION

Semester I → Semester II

↓

SUMMER INTERNSHIP — Mandatory 8–10 Week Industry Internship

↓

YEAR 2 — BUSINESS ANALYTICS SPECIALISATION

Semester III → Semester IV

↓

CAPSTONE — Industry-Based Business Analytics Project

Developer: horizontal timeline on desktop; vertical timeline on mobile.

09 Year 1 – Common Curriculum

COMMON MANAGEMENT FOUNDATION — ALL STUDENTS

Semester I and Semester II are common before students move into the specialised Business Analytics curriculum.

UI: SEMESTER I | SEMESTER II tabs.

CMS: Use a reusable Common Year 1 Curriculum component across relevant PGDM programme pages.

The approved Semester I and Semester II subject list should be inserted from the common PGDM curriculum. This document does not invent those subjects.

10 Summer Internship

LEARN IN THE CLASSROOM. APPLY IT IN THE INDUSTRY.

After Year 1, students undertake a mandatory 8–10 week Summer Internship.

Potential exposure: Business Analytics, Data Analysis, Business Intelligence, Market Analytics, Customer Analytics, Financial Analytics, Operations Analytics, Sales Analytics, Dashboard & Reporting and Data-Driven Decision Making.

11 Year 2 – Business Analytics Specialisation

BUSINESS ANALYTICS SPECIALISATION

Year 2 progresses through: Data → Prediction → Decision → Optimization → AI → Strategy.

UI: Semester III / Semester IV tabs. On mobile, make tabs horizontally swipeable.

Semester III	Semester IV
Data Analytics for Managers	Prescriptive Analytics
Predictive Analytics	Advanced Excel & VBA
SQL & Data Warehousing	AI Applications in Business Analytics
Business Intelligence & Visualization	Analytics Strategy & Consulting
Decision Modeling & Optimization	Business Analytics Simulation & Case Lab

Semester III	Semester IV
Domain Analytics (Marketing / Finance / HR / Operations)	Capstone Project (Industry-Based)

12 Tools & Skills You Will Master

Build Practical Analytics Capabilities Alongside Management Expertise.

Skill Area	Developer Copy
Advanced Excel & VBA	Develop advanced spreadsheet analysis and automation capabilities using Excel & VBA.
SQL & Database Management	Understand how business data is stored, structured, queried and managed using SQL and database systems.
Business Intelligence	Develop practical exposure to Power BI / Tableau for dashboards, reporting and data visualisation.
Predictive & Prescriptive Analytics	Understand analytical approaches used for forecasting, prediction and business recommendations.
Decision Modeling & Simulation	Develop the ability to use decision modelling and simulation for business problem-solving.
AI-enabled Analytics	Explore the use of Artificial Intelligence in Business Analytics and data-driven business processes.

13 Experiential Learning

FROM DATA TO DECISION

Understand → Analyse → Predict → Optimise → Decide

Business Cases: Analyse real-world business problems using analytical approaches.

Simulation Labs: Use simulation-based learning to explore business decisions and scenarios.

Domain Analytics: Apply analytics across Marketing, Finance, HR and Operations.

Business Intelligence: Create dashboards and visualise information for decision-making.

Industry Internship: Gain exposure to real-world organisational environments.

Industry-Based Capstone: Solve an industry-oriented business analytics problem.

14 Expert Testimonials – Two YouTube Videos

Section heading: WHAT INDUSTRY EXPERTS SAY

Recommended placement: After Why Business Analytics and before detailed Curriculum.

Desktop: Two video cards side-by-side. Mobile: Stack vertically.

Expert Video 01: Why Business Analytics Matters to Modern Managers — Data-Driven Decision Making, Business Intelligence, analytics in management and employer expectations.

Expert Video 02: Building Careers in Business Analytics — Business Analytics Careers, Predictive Analytics, AI-enabled Analytics and future management roles.

CMS: Expert Name, Designation, Organisation, Expertise, YouTube URL, Thumbnail, Short Description, Display Order, Active/Inactive.

Technical: No autoplay. Lazy-load YouTube iframe on click. Accessible title and controls.

15 International Immersion

THINK GLOBAL. ANALYSE GLOBAL BUSINESS.

Destination tabs: Dubai | Singapore | Thailand | Bali, Indonesia

Each tab: academic exposure, business/industry exposure, global business perspective, cross-cultural learning, international networking and educational/cultural experience.

International immersion opportunities, destinations, institutional visits and programme components are subject to academic schedule, partner availability and applicable programme arrangements.

16 Assessment Framework

Weight	Assessment Component
50%	Theory Examination
30%	Tool / Lab / Skill-Based Work
20%	Viva / Project / Case Defence
100%	Total

17 Placements & Career Support

FROM ANALYTICS LEARNING TO CAREER READINESS

₹18.5 LPA — Highest CTC*

100% — Placement Assistance*

Career preparation: Resume Development, Interview Preparation, Group Discussions, Communication Skills, Aptitude Preparation, Industry Interaction, Career Counselling, Internship Support and Domain-Oriented Career Preparation.

Developer must use “100% Placement Assistance”, not “100% Placement”.

18 Career Pathways

Career Cluster	Potential Roles
Business Analytics	Business Analyst; Business Analytics Executive; Analytics Associate; Management Analytics Roles
Business Intelligence	Business Intelligence Analyst; BI Executive; Dashboard & Reporting Analyst; Reporting Analyst
Data & Predictive Analytics	Data Analyst; Predictive Analytics Associate; Data Analytics Executive; Forecasting & Analytics Roles
Domain Analytics	Marketing Analytics; Customer Analytics; Sales Analytics; Financial Analytics; Risk Analytics; HR Analytics; People Analytics; Operations Analytics; Supply Chain Analytics
Analytics Strategy & Consulting	Analytics Consultant; Business Analytics Consultant; Analytics Strategy Roles; Data-Driven Transformation Roles

Career pathways are indicative and should not be presented as guaranteed placement outcomes.

19 Eligibility

Use the current approved IMAS eligibility criteria.

CMS fields: Educational Qualification, Minimum Marks, Accepted Graduation Background, Entrance / Selection Requirements, Other Applicable Conditions.

SEO themes: PGDM Business Analytics Eligibility, PGDM Business Analytics Admission Eligibility, Business Analytics PGDM Eligibility.

Do not hard-code eligibility until the current approved admission policy is confirmed.

20 Admission Process

Step	Process
01	Enquiry
02	Application – Complete the PGDM Application Form
03	Counselling – Discuss academic background, interests and career goals
04	Selection – Complete applicable selection process
05	Admission – Complete admission formalities
06	Programme Begins

21 Fee Structure

Display the approved programme fee structure clearly. The fee breakdown below must be CMS-editable and displayed consistently wherever fees are shown on the programme page.

Fee Component	Amount
Programme Fee	₹5,45,000
Admission Fee	₹50,000
Other Applicable Charges	₹21,600
Total Programme Fee	**₹6,16,600**

Developer note: Fees must be validated against the latest IMAS-approved fee schedule before publication.

25 SEO & Technical Implementation

Recommended URL: /programs/pgdm-business-analytics

Suggested Page Title: PGDM Business Analytics | PGDM Business Analytics in Kolkata | IMAS

Suggested Meta Description: Explore PGDM Business Analytics at IMAS — a 2-year management programme combining Business Intelligence, Predictive & Prescriptive Analytics, Decision Modelling, AI-enabled Analytics, internship and an industry-based capstone.

H1: PGDM – Business Analytics

Structured Data: Course, FAQPage, BreadcrumbList and Organization where applicable.

Internal Linking: PGDM overview, admission, fees, placements, international immersion, brochure and relevant analytics content.

Image Alt Text: Descriptive and meaningful; avoid keyword stuffing.

Canonical: Self-referencing canonical unless site architecture requires otherwise.

26 Responsive, Accessibility & Performance Requirements

Mobile: Horizontal swipeable tabs, stacked metrics, vertical timeline, stacked cards and fixed bottom CTA.

Desktop: Premium whitespace, clear hierarchy and responsive card grids.

Tabs: Keyboard accessible, visible focus state, ARIA roles/labels and appropriate state handling.

Accordion: Keyboard accessible with expanded/collapsed state announced to assistive technologies.

Video: Lazy-load YouTube embeds; no autoplay.

Images: Responsive, compressed and lazy-loaded below the fold.

Performance: Minimise third-party scripts and protect Core Web Vitals.

Accessibility: Semantic HTML, sufficient contrast, descriptive labels and keyboard navigation.

CMS: Programme information, curriculum, fees, placement figures, testimonials, immersion destinations and FAQs editable without code changes.

27 Non-Negotiable Developer Requirements

- The programme must be presented as PGDM – Business Analytics.
- Semester I & II must be clearly identified as the Common Curriculum.
- Semester III & IV must be identified as the Business Analytics Specialisation.
- Do not mix Year 1 common subjects into Year 2 specialised curriculum.
- Use tabbed curriculum navigation.
- The six Tools & Skills must have a prominent visual section.
- The two Expert Testimonial video blocks must be CMS-editable.
- International Immersion must use destination tabs.
- Placement information must not make unsupported employment guarantees.
- Use 100% Placement Assistance, not “100% Placement”.
- Fees, eligibility, placement figures and other changeable information must be CMS-editable.
- SEO keywords must be integrated naturally; do not keyword-stuff.
- Mobile experience must be designed as a first-class responsive experience.
