| 20 | FAQs | Accordion |
| 21 | Final CTA | Conversion block |

# 03 Hero Section

### H1: PGDM – FINTECH

Headline: Build Management Expertise. Master FinTech. Shape the Future of Financial Services.

A future-focused PGDM FinTech programme combining management education with practical learning in Digital Payments, Payment Systems, Blockchain, RegTech, API Banking, Open Finance, FinTech Product Management, AI in Financial Services and FinTech Risk & Cyber Security.

Programme badges: 2-Year Full-Time PGDM | Common Management Foundation in Year 1 | FinTech Specialisation in Year 2 | Mandatory Internship | Industry-Based Capstone

CTAs: Apply Now | Download Brochure | Talk to an Admissions Counsellor

Design: Premium financial-technology visual language. Avoid making the page look like a pure programming or cryptocurrency programme; this is a management-led programme with FinTech specialisation.

# 04 Placement Highlights

| Highlight | Display |
|---|---|
| Highest CTC | ₹18.5 LPA* |
| Placement Support | 100% Placement Assistance* |
| Programme Duration | 2 Years |
| Industry Internship | Mandatory 8–10 Weeks |
| Capstone | Industry-Based |

*Placement figures and claims must be validated by IMAS before publication. Use “100% Placement Assistance”, not “100% Placement”.

# 05 Programme Snapshot

| Component | Structure |
|---|---|
| Duration | 2 Years |
| Format | Full-Time |
| Year 1 | Common Management Foundation |
| Semester I | Common Curriculum |
| Semester II | Common Curriculum |
| Summer | Mandatory 8–10 Week Industry Internship |
| Year 2 | FinTech Specialisation |
| Semester III | FinTech Ecosystem, Payments, Blockchain, RegTech, Open Finance & Product Management |
| Semester IV | InsurTech, WealthTech, Risk, Cyber Security, AI/ML, Compliance Automation, Simulation & Capstone |
| Learning Approach | Management + Finance + Technology + Regulation + Application |

# 06 Why PGDM – FinTech?

## WHERE MANAGEMENT MEETS THE FUTURE OF FINANCIAL SERVICES

Modern financial services are being reshaped by digital payments, APIs, open finance, blockchain, regulatory technology, artificial intelligence and technology-enabled financial products.

Management Foundation: Build a foundation in management, economics, finance, marketing, HR and business environment.

Digital Payments: Understand payment systems and the digital transaction ecosystem.

Open Finance: Explore API Banking and emerging open-finance models.

Blockchain: Build foundational understanding of blockchain technology, cryptocurrency concepts and smart contracts.

RegTech: Connect financial regulation with technology-enabled compliance.

FinTech Product Management: Develop product thinking for technology-enabled financial services.

AI & Financial Services: Explore AI and machine-learning applications within financial services.

# 07 What Makes This Programme Different

| Feature | Content Direction |
|---|---|
| Management + FinTech | Learn management concepts alongside practical financial-technology capabilities. |
| Common Foundation | Year 1 establishes the common management foundation before specialised FinTech learning. |
| Digital Payments | Build understanding of digital payments, payment systems and UPI-related ecosystems. |
| Open Finance + APIs | Explore API Banking and Open Finance as emerging financial-services models. |
| Blockchain + RegTech | Understand blockchain fundamentals and technology-enabled financial compliance. |
| AI in Finance | Explore AI and machine-learning applications in financial services. |
| Industry-Based Capstone | Apply FinTech concepts to an industry-oriented project in Semester IV. |

# 08 Programme Architecture

**YEAR 1 — COMMON MANAGEMENT FOUNDATION**

Semester I → Semester II

↓

**SUMMER INTERNSHIP — Mandatory 8–10 Week Industry Internship**

↓

**YEAR 2 — FINTECH SPECIALISATION**

Semester III → Semester IV

↓

**CAPSTONE — Industry-Based FinTech Project**

Developer: horizontal timeline on desktop; vertical timeline on mobile.

# 09 Year 1 – Common Curriculum

## COMMON MANAGEMENT FOUNDATION — ALL STUDENTS

Semester I and Semester II are common before students move into the specialised FinTech curriculum.

UI: SEMESTER I | SEMESTER II tabs.

CMS: Use a reusable Common Year 1 Curriculum component across relevant PGDM programme pages.

The approved Semester I and Semester II subject list should be inserted from the common PGDM curriculum. This document does not invent or duplicate those subjects.

# 10 Summer Internship

**LEARN IN THE CLASSROOM. APPLY IT IN THE FINANCIAL TECHNOLOGY INDUSTRY.**

After Year 1, students undertake a mandatory 8–10 week Summer Internship.

Potential exposure: Digital Payments, Banking Technology, FinTech Product Management, Digital Lending, WealthTech, InsurTech, RegTech & Compliance, Financial Analytics, Risk & Cyber Security, Customer Experience and Digital Financial Services.

CMS: duration, internship areas, year, partner/company logos, student stories and approval status.

# 11 Year 2 – FinTech Specialisation

## FINTECH SPECIALISATION

Year 2 progresses through: Ecosystem → Payments → Blockchain → Regulation → Open Finance → Product → Risk → AI → Compliance → Capstone.

UI: Semester III / Semester IV tabs. On mobile, make tabs horizontally swipeable.

| Semester III | Semester IV |
|---|---|
| Financial Technology Ecosystem | InsurTech & WealthTech |
| Digital Payments & Payment Systems | Risk Management & Cyber Security in FinTech |
| Blockchain Technology & Cryptocurrency | AI & Machine Learning in Financial Services |
| Financial Regulations & Compliance (RegTech) | RegTech & Compliance Automation |
| API Banking & Open Finance | FinTech Case Study & Simulation Lab |
| FinTech Product Management | Capstone Project (Industry-Based) |

# 12 Tools & Skills You Will Master

**Build Practical FinTech Capabilities Alongside Management Expertise.**

| Skill Area | Developer Copy |
|---|---|
| Digital Payments & UPI Systems | Develop practical understanding of digital payments, payment-system structures and UPI-related financial-services applications. |
| API Banking & Open Finance | Understand how APIs support connected financial services and emerging open-finance models. |
| Blockchain & Smart Contracts (Basics) | Build foundational understanding of blockchain technology and the business applications of smart contracts. |
| Financial Dashboards (Excel / Power BI) | Develop dashboard and reporting capabilities for financial and business data. |
| RegTech & Compliance Tools | Understand technology-enabled compliance processes and regulatory workflows. |
| AI Applications in Finance | Explore practical applications of AI and machine learning in financial services. |

**Hands-on tools are compulsory and evaluated.**

# 13 Experiential Learning

## FROM FINTECH CONCEPTS TO FINANCIAL-SERVICES APPLICATION

Understand → Explore → Build → Simulate → Apply

FinTech Cases: Analyse real-world financial technology scenarios and business problems.

Simulation Labs: Use simulation-based learning to explore financial-services decisions and scenarios.

Digital Finance: Apply learning to payments, APIs, open finance and digital financial services.

Product Thinking: Explore customer needs, financial products and technology-enabled product development.

Industry Internship: Gain exposure to real-world organisational and FinTech environments.

Industry-Based Capstone: Solve an industry-oriented FinTech problem in Semester IV.

# 14 Expert Testimonials – Two YouTube Videos

**Section heading: WHAT INDUSTRY EXPERTS SAY**

Recommended placement: After Why PGDM – FinTech and before detailed Curriculum.

Desktop: Two video cards side-by-side. Mobile: Stack vertically.

Expert Video 01: Why FinTech Matters to Modern Managers — Digital Payments, Open Finance, FinTech Products and employer expectations.

Expert Video 02: The Future of Financial Services — AI, Blockchain, RegTech, Cyber Security and emerging FinTech careers.

CMS: Expert Name, Designation, Organisation, Expertise, YouTube URL, Thumbnail, Short Description, Display Order, Active/Inactive.

Technical: No autoplay. Lazy-load YouTube iframe on click. Accessible title and controls.

# 15 International Immersion

**THINK GLOBAL. UNDERSTAND GLOBAL FINANCIAL SERVICES.**

Destination tabs: Dubai | Singapore | Thailand | Bali, Indonesia — only where currently approved by IMAS.

Each tab: academic exposure, business/industry exposure, global business perspective, cross-cultural learning, international networking and educational/cultural experience.

International immersion opportunities, destinations, institutional visits and programme components are subject to academic schedule, partner availability and applicable programme arrangements.

# 16 Assessment Framework

| Weight | Assessment Component |
|---|---|
| 50% | Theory Examination |
| 30% | Tool / Lab / Skill-Based Work |
| 20% | Viva / Project / Case Defence |
| 100% | Total |

**For FinTech, the 30% Tool / Lab / Skill-Based Work component should visibly connect with the compulsory and evaluated hands-on tools requirement.**

# 17 Placements & Career Support

## FROM FINTECH LEARNING TO CAREER READINESS

₹18.5 LPA — Highest CTC*

100% — Placement Assistance*

Career preparation: Resume Development, Interview Preparation, Group Discussions, Communication Skills, Aptitude Preparation, Industry Interaction, Career Counselling, Internship Support and Domain-Oriented Career Preparation.

Developer must use “100% Placement Assistance”, not “100% Placement”. Placement figures must be validated by IMAS for the programme before publication.

# 18 Career Pathways

| Career Cluster | Potential Roles |
|---|---|
| Digital Payments | Payments Executive; Payments Operations; Digital Payments Analyst |
| FinTech Product | FinTech Product Executive; Product Associate; Product Operations |
| Open Banking / APIs | Open Finance Analyst; API Product / Operations Roles |
| RegTech / Compliance | RegTech Analyst; Compliance Technology Associate; Compliance Operations |
| Risk & Cyber Security | FinTech Risk Analyst; Risk Operations; Cyber Security Support Roles |
| AI in Finance | Financial Analytics Associate; AI/ML Business Applications Roles |
| Blockchain | Blockchain Business Analyst; Digital Asset / Blockchain Operations Roles |
| InsurTech / WealthTech | InsurTech Associate; WealthTech Operations / Product Roles |

Career pathways are indicative and should not be presented as guaranteed placement outcomes.

# 19 Eligibility

Use the current approved IMAS eligibility criteria.

CMS fields: Educational Qualification, Minimum Marks, Accepted Graduation Background, Entrance / Selection Requirements, Other Applicable Conditions.

SEO themes: PGDM FinTech Eligibility, PGDM FinTech Admission Eligibility, FinTech PGDM Eligibility.

**Do not hard-code eligibility until the current approved admission policy is confirmed.**

# 20 Admission Process

| Step | Process |
|---|---|
| 01 | Enquiry |
| 02 | Application – Complete the PGDM Application Form |
| 03 | Counselling – Discuss academic background, interests and career goals |
| 04 | Selection – Complete applicable selection process |
| 05 | Admission – Complete admission formalities |
| 06 | Programme Begins |

# 21 Fee Structure

Display the approved programme fee structure clearly. The fee breakdown below must be CMS-editable and displayed consistently wherever fees are shown on the programme page.

| Fee Component | Amount |
|---|---|
| Programme Fee | ₹5,45,000 |
| Admission Fee | ₹50,000 |
| Other Applicable Charges | ₹21,600 |
| Total Programme Fee | ₹6,16,600 |

Fee figures must be CMS-editable.

**Developer note: Fees must be validated against the latest IMAS-approved fee schedule before publication.**

# 22 FAQs

PGDM FinTech Admission • PGDM FinTech Admission 2026 • PGDM FinTech Fees • PGDM FinTech Eligibility • PGDM FinTech Curriculum • PGDM FinTech Placement • PGDM FinTech Colleges in Kolkata • PGDM FinTech Course in Kolkata

## SUBJECT / SKILL KEYWORDS

Digital Payments • UPI Systems • API Banking • Open Finance • Blockchain • Smart Contracts • Cryptocurrency • RegTech • FinTech Product Management • InsurTech • WealthTech • AI in Finance • Machine Learning in Financial Services • FinTech Risk Management • Cyber Security in FinTech • Compliance Automation

# 25 SEO & Technical Implementation

Recommended URL: /programs/pgdm-fintech

Suggested Page Title: PGDM FinTech | PGDM in FinTech in Kolkata | IMAS

Suggested Meta Description: Explore PGDM FinTech at IMAS — a 2-year management programme combining digital payments, blockchain, open finance, RegTech, FinTech product management, AI in finance and an industry-based capstone.

H1: PGDM – FinTech

Structured Data: Course, FAQPage, BreadcrumbList and Organization where applicable.

Internal Linking: PGDM overview, admission, fees, placements, international immersion, brochure and relevant FinTech / digital finance content.

Image Alt Text: Descriptive and meaningful; avoid keyword stuffing.

Canonical: Self-referencing canonical unless site architecture requires otherwise.

# 26 Responsive, Accessibility & Performance Requirements

Mobile: Horizontal swipeable tabs, stacked metrics, vertical timeline, stacked cards and fixed bottom CTA.

Desktop: Premium whitespace, clear hierarchy and responsive card grids.

Tabs: Keyboard accessible, visible focus state, ARIA roles/labels and appropriate state handling.

Accordion: Keyboard accessible with expanded/collapsed state announced to assistive technologies.

Video: Lazy-load YouTube embeds; no autoplay.

Images: Responsive, compressed and lazy-loaded below the fold.

Performance: Minimise third-party scripts and protect Core Web Vitals.

Accessibility: Semantic HTML, sufficient contrast, descriptive labels and keyboard navigation.

**CMS: Programme information, curriculum, fees, placement figures, testimonials, immersion destinations and FAQs editable without code changes.**

# 27 Non-Negotiable Developer Requirements

- The programme must be presented as PGDM – FinTech.
- Semester I & II must be clearly identified as the Common Curriculum.
- Semester III & IV must be identified as the FinTech Specialisation.
- Do not mix Year 1 common subjects into Year 2 specialised curriculum.
- Use tabbed curriculum navigation.
- The six Skills & Tools must have a prominent visual section.
- “Hands-on tools are compulsory and evaluated.” must be clearly visible.
- The two Expert Testimonial video blocks must be CMS-editable.
- International Immersion must use destination tabs where approved.
- Placement information must not make unsupported employment guarantees.
- Use 100% Placement Assistance, not “100% Placement”.
- Fees, eligibility, placement figures and other changeable information must be CMS-editable.
- SEO keywords must be integrated naturally; do not keyword-stuff.
- Mobile experience must be designed as a first-class responsive experience.
- The page structure, section numbering and implementation logic should remain consistent with the PGDM – Business Analytics page for programme-family consistency.
